

# ben callery architects

We specialize in designing creative sustainable architecture & providing project management that delivers construction to real budgets & timelines.

Based in Melbourne, Australia we have designed award winning sustainable buildings across the city's Inner North, Bayside & Eastern suburbs and surrounding coastal and rural locations.

Our Buildings work with the environment and are a pleasure to occupy.

Our creative sustainable designs have won the Australian Timber Design Awards Young Designer Award, Environ BPN Sustainability Award, Look Home Green Design Award and were finalists in the Australian Institute of Architects, Victorian chapter, Sustainable Architecture Awards.

## SUSTAINABILITY

Our sustainable design method employs proven techniques of passive solar design, natural ventilation & thermal efficiency making our buildings naturally comfortable.

## CREATIVITY

Our creativity enables us to execute environmentally sustainable design within the constraints imposed on sites and turn pragmatic, scientific theory into unique beautiful architecture.

## DELIVERY

Our project management method revolves around regular real assessment of the brief, budget and timelines empowering our clients to make informed decisions throughout the design, documentation & construction process.

We have built, hands-on, many of our own designs affording us unique expertise in practicality & cost-effectiveness.

## ben callery architects

Here's what some of our Clients have had to say:

*"Ben has worked with us through all stages of our home renovation - design, development, council approval, documentation, tendering/negotiation, and project management. He has brought imagination, knowledge, solid experience, an eye for detail and a good work ethic to the project. He has listened to us, but brought extra back - which has given a better result than just agreeing with us or telling us what (we thought) we wanted to hear. Arrangements and relationships have been refreshingly transparent and respectful."*

-Tim, client, Northcote, Melbourne.

*"We enjoyed working with Ben – it was stress-free; and he was very good at presenting and discussing different options and ideas as the project progressed. We had confidence in not only his advice, but also the advice of other professionals he had helped us choose. We have no hesitation in recommending Ben as an Architect and Project Manager."*

-Rob, client, Bayside Melbourne.

*"Ben engaged with our community to understand our needs, then designed the transformation of the disused school building into a modern, welcoming and warm facility that enriches the parish of St Ambrose and the broader Brunswick community."*

-Michael, client, St Ambrose, Brunswick, Melbourne.

*"We hired Ben to design and project manage the building of our beach house. Ben did a fabulous job and we would highly recommend him as an architect and project manager. He is a good listener and took our ideas, combined them with his experience, knowledge and creativity to produce a plan we were very happy with. He helped us find a great builder and worked with him to make a beautiful house that we love. From start to finish Ben was very professional, well organised, good with deadlines, a good communicator, he looked for solutions and was flexible in his approach. One of the challenges which he handled very well was working with us long distance as we were living in Europe, he was based in Melbourne and our project was in coastal Victoria. He was able to work with us via telephone, email and the occasional face to face meeting and it all went smoothly. Similarly with managing the project long distance, Ben worked very well with the builder. It was overall a very good experience."*

-Janine, client, Singapore & Melbourne.
