

We create homes for people who care about sustainable design, nature and enduring architecture.

GUILD
ARCHITECTS

Our homes are expressive, functional and delightful to live in. We address the human need for nature through integrating the environment into the core of every design. Our projects are enjoyable design-and-build experiences; we prioritise your budget, and your schedule. Great design outcomes come through a joint effort between architect and client; we want your home to meet your needs and feel perfect to you.

Guild Architects is a Melbourne-based practice recognised for its dedication to residential design. We create homes for people who care about enduring architecture and sustainable design.

Through every Guild Architects project you:

- Work with director Penny Guild every step of way
- Know your timelines and budget are prioritised
- Enjoy the benefit of Penny's consultative, flexible approach to meeting your needs
- Stay involved as much or as little as you want
- Have the benefit of Penny's extensive residential project management experience

Contact Penny on +61 423 714 729 for a free consultation to discuss your Mullum Creek home.
