

ande bunbury architects

designers of environmentally sensitive buildings

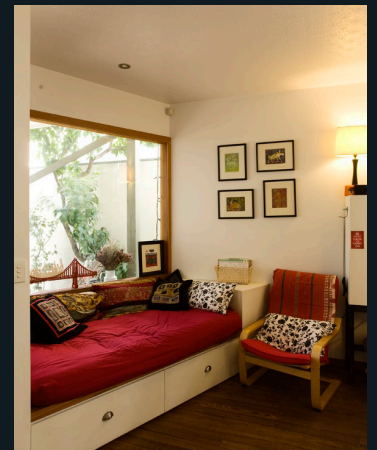

Ande Bunbury Architects are an award-winning Melbourne-based architectural firm with a reputation for finely crafted architectural solutions. Established in 1998, we provide expertise in architecture, interior design, environmental sustainability and project management.

Our projects demonstrate commitment to design for sustainability in water, energy and materials; integrate new techniques and systems with centuries-old fundamental principles. Buildings incorporate passive solar design; natural ventilation; solar heating, cooling, power & hot water; rainwater collection systems; grey water recycling; and water efficient landscaping.

Our buildings are designed to be cost effective yet beautiful, for flexibility of use over time, have a long lifespan, and low toxicity & maintenance finishes.

- passive solar
- low toxicity materials & finishes
- carbon neutral/carbon positive
- solar heating and cooling
- rainwater collection
- grey water recycling
- renewable energy generation
- water efficient landscaping
